JANUARY 9, 2013

GENERAL MANAGER'S REPORT

ITEM

Standing report to your Honorable Board -- *Period covered by this report is December 8, 2012 through January 4, 2013.*

DISTRICT BUSINESS

Administrative

- Public Notice of the proposed solid waste rate increase was mailed to customers during the week of December 21. Three protest votes have been received to date.
- The Supplemental Water Alternatives Evaluation Committee continues to meet regularly and work in subcommittee teams outside of regular meetings. The seven citizen volunteer members are showing great dedication and diligence in their work. Draft Minutes from the Committee's December 19, 2012 meeting are provide under Agenda Item G. District Consultant Michael K. Nunley, who acts as the non-voting Committee Chair, is receiving praise from Committee members and members of the public who are attending meetings and observing the evaluation process.
- Application period for Assistant Engineer vacancy ended on December 14, 2012. Forty-six applications were received. Interviews are tentatively scheduled for the week of January 28, 2013.
- Proposal period for the Blacklake Wastewater Reclamation Facility and Wastewater Collection System closed on December 21, 2012. Four proposals were received. Your Board is scheduled to award the contract at the January 23, 2013 Regular Meeting.
- SLOWATERWISELANDSCAPING.com website December 2012 summary report is attached.. This web site was developed and is maintained by SLO County Partners in Water Conservation of which the District is a participating member.
- CSDA is offering free on-line/on-demand Ethics (AB 1234) training for member Districts. Information on the offering is attached.
- County Planning continues to advance an update of their Resource Management System. Staff has provide data on District operations and informal comments twice, most recently via WRAC. County staff are scheduled to release a final draft RMS update on February 13 for consideration by the Board of Supervisors on February 19th. Staff's most recent comments are attached.

Safety Program

- No accidents or injuries to report.

Public Outreach

- Public Information Assistant, Jessica Matson began work with the District on December 11, 2012. Ms. Matson is a contract employee working on a part-time basis and works at the District's Administrative office. Following is a summary of public outreach progress:

- Created bill stuffer for Jan/Feb 2013 bills and send to printing (attached)
- Press Releases: "NCSD Hires Public Information Assistant," "Trash Rates for Residential Customers May Increase in 2013," "District's Board Swear in New Directors," "District's Board Supports Cypress Ridge Residential Development," "Committee Evaluates Supplemental Water Options for the District" (media log and press releases attached)
- Set initial layout and production schedule for Winter 2013 Newsletter
- Initiation of discussion with Adobe Press for a regular Manager's column

Meetings

Meetings attended:

- December 10, Maria Vista Estates – two meetings
- December 12, Regular Board Meeting
- December 14, WSC regarding District Conservation Program
- December 14, Cannon Associates on BLWWRF Master Plan
- December 17, City of Santa Maria Utilities Director
- December 18, District Property Negotiator
- December 19, NMMA Technical Group
- December 19, SWAEC
- December 21, Special District Managers

Meetings Scheduled:

- January 7, Review Assistant Engineer Applications with AGM and Engineer
- January 8, Operations Management and Supervisor on organization
- January 8, Review BLWWRF Proposals with Engineer and Superintendent
- January 9, Regular Board Meeting
- January 10, Management Coordination
- January 14, SWAEC
- January 14, Board Officers
- January 15, NMMA Technical Group
- January 18, CSDA SLO County Chapter Annual Meeting

Water/Wastewater News of Interest

- County rain gauge reports for area gauges are provided – See Attachment.
- December 14, 2012, Soquel Creek Water District water supply concerns.

RECOMMENDATION

Staff seeks direction and input from your Honorable Board

Subject: CSGA Says Thank You with Free Ethics Training - 1/2/2013

If this email does not display properly, please view our [online version](#).
To ensure receipt of our email, [please add 'CSGA@informz.net'](mailto:CSGA@informz.net) to your address book.

Thank You from the California Special Districts Association - 1/2/2013

Thank you for renewing your membership in CSGA. We appreciate your investment and continued support of this association.

As promised, we are offering your entire board of directors and staff access to free AB1234 Ethics Compliance Training, just for renewing your dues by the January 1, 2013 deadline. This is an on-demand training that your staff and board can take at their convenience on a computer of their choice. The training will be available during the months of January and February of 2013. To verify completion of this training, we ask that you complete and submit a short test to the CSGA office by March 8, 2013.

[Click here for access to the free training.](#)

We also encourage you to take advantage of the full range of benefits we offer:

- Excellent educational programs with discounted member pricing
- Access to cost-effective risk management services and tax-exempt financings
- Job postings
- Listserv and other member communication tools
- Added-value benefit programs like the Special District Purchasing Card
- One hour free legal advice per year/per district
- Online bookstore with discounted member pricing
- Free downloadable publications

With our membership of more than 1,000 agencies, CSGA is respected for our strong collective voice at the Capitol. In addition, we are committed to developing programs and services designed to make your district, staff and representatives more successful and effective in serving your constituencies.

Should you ever have any questions or need assistance, please make CSGA your first call at (877) 924-2732. And, once again, thank you for your support!

Subject: RMS Draft
Attachments: 2811_001.pdf

Courtney,

Thank you for the recent WRAC agenda materials including WRAC draft comments on current draft of County Planning effort to update RMS.

I had provided comments on a previous draft directly to County planning. I am providing additional comments (below) to this current draft for WRAC and County Planning consideration.

- It may be best to defer to the court defined NMMA and NCMA for groundwater quantity and quality evaluations.
- I have attached pages 31-34 of the current NCMA report where the experts studying that area of the Basin describe recent seawater intrusion indication in the NCMA area and potential causes, including pumping in the NMMA. This would seem like an issue worthy of touching on in course of a water resources review of the NCMA/NMMA/ South SLO County. (I am happy to provide a full copy of NCMA report if Oceano or others in that area cannot).
- The 'Water Rate Data' seems odd for a resources document. I think you will find rates hard to summarize. The column "Water Use" in gallons/day is misleading and will be confused with the state mandated per capita reporting. The basis for your tables is not provided. The numbers you provide for NCS D do not represent our per capita use or rates. The per capita use in Woodlands is highest of those I have seen that report to the county from our area. If you isolate the water use in any of the three County approved golf course communities on the Mesa, I am certain you will find they have the highest per capita water use. Worse, the consumption of water by golf courses is excessive and breaks the 'semi' closed loop supply we enjoy on this sand dune called the mesa.
- Nipomo area wastewater; NCS D provides WW collection and treatment to a PORTION of the area within the URL, the rest of the folks are on septics (about 1,000 of our connections/ 3,000 customers, and most of GSWC customers are on septic). Our Southland plant is being UPGRADED, not expanded. The upgrade will significantly improve effluent quality. The upgrade takes us from primary ponds, to secondary activated sludge. Tertiary is possible future – but what isn't possible in future (consider dropping tertiary statement). NCS D is participating in basin-wide S&N planning via NMMA on other avenues. Expansion plans for southland are triggered when we reach 75% of capacity (we do have them). County development approval will be required to trigger any increase in flow.
- NMWCA Water Supply section; NCS D accounts for ~25% of the GW production across the NMWCA (leave references to sewer/septic out of this section, confusion enough). We do NOT serve ~25% of the Mesa (by area or any other measure).
- GW Adjudication Section; we had a vote on a funding approach for an intertie line last year that failed. Please correct your language that states property owners voted down the project – this is very damaging misstatement of the facts. The NMMA TG report clearly points out concerns for nitrate trends/issues (page 43 of current report). Nitrate levels continue to elevate and are likely related to AG, Urban, and golf course sources (all sources approved by County Planning in past). I believe RWC and GSWC have wells that exceed drinking water

standards for nitrate and are forced to blend water from these wells with others. County health department can attest to other 'small' water providers that have similar or more pressing issues. – significant issues do exist!

- Water Provider section of NMWCA section includes reference to more than one 'small' provider that is NOT located on NMMA. It is pointed out numerous places that there is no reporting or oversight of the 'smalls' and/or private water companies – yet no statement is made to what County, who approved all these entities, intends to do in this regard.
- NCS D's conservation efforts are the only reported on. Are there no others? How have others reduced pumping in since 2005 if at all?
- Issues and Recommendation section; the County may not be able to 'regulate' gw pumping, but the County sure has control over issues that impact pumping as the report clearly points out. The county approved the 90+ holes of golf courses which represent the single most consumptive use of groundwater across the mesa.
- The District's conservation program remains active and successful as evidenced by data reported in earlier sections (23% reduction) – please correct this wording and consider inserting the lack of other programs across the mesa as a priority issue. It may be more prudent for County to collect and administer the \$750 per toilet fee, at least outside NCS D since we have no authority to force compliance and coordination with County has been very difficult.
- Supplemental Water Fee; To our knowledge, County has never defined or collected the fee. The District has expended \$4M in its efforts to develop supplemental water to benefit the entire NMWCA – all of which has been paid for by fees collected on new County approved development within our services boundary since 2005. Project FUNDING by tax assessment was not supported by property owners.
- Nipomo Mesa WW Treatment section; under facilities, move the last sentence of paragraph two to end of paragraph one. Move the last sentence of paragraph one to after paragraph two – close enough.

I hope these comments aid County Planning and WRAC in further review and update of this draft RMS. Please keep the District informed on subsequent drafts and schedule for Board of Supervisor consideration.

I would appreciate your acknowledgement of receiving these comments.

Respectfully,

Michael S. LeBrun, P.E.

NIPOMO COMMUNITY SERVICES DISTRICT

Providing the community with reliable, quality, cost-effective services now and in the future.

HAPPY NEW YEAR!

New Board of Directors

On December 12, 2012, the District's Board of Directors held their regular meeting and General Manager, Michael S. LeBrun swore in the District's new Directors, Bob Blair and Craig Armstrong . Under separate action, the Board elected officers for 2013.

Current Board of Directors:

Jim Harrison, President

Larry Vierheilig, Vice President

Dan Gaddis

Bob Blair

Craig Armstrong

Nipomo Community Services District Board Room

Nipomo Community Services District Office

To sign up for Board agendas, please email info@ncsd.ca.gov or sign up online under Quick Links.

NIPOMO COMMUNITY SERVICES DISTRICT

Providing the community with reliable, quality, cost-effective services now and in the future.

*Construction of Southland
Wastewater Treatment Facility*

Wastewater Facility Upgrade Project Progressing on Schedule

On July 27, 2012, the District broke ground on its largest and most significant project in its nearly 50-year history, the **Southland Wastewater Treatment Facility Upgrade**. The 13-Million dollar project is scheduled to take 18 months to complete. The upgrade will help Nipomo Community Services District meet increasingly strict State mandates and benefit our environment and community by implementing new technology that will greatly improve the quality of plant discharge. The 'big pile of sand' visible from Highway 101 south of town is evidence of the ongoing project.

Water Supply Update

2013 marks the twenty-year anniversary of Nipomo passing on the opportunity to participate in the Coastal Branch of the State Water Project. Today, all water users across the Mesa continue to rely entirely on groundwater – from the Refinery operations, to the Greenhouses and other agricultural users, the 75-holes of golf, community parks, schools and 30,000 residents – ALL rely 100% on groundwater. Long-term trends pose two significant problems, the demand for water continues to increase while the quantity of groundwater available remains fixed. Therefore, the health and reliability of our groundwater supply is in decline. Unless we take action to address the increasing problem, our next multi-year drought may result in significant and prolonged water rationing throughout the area.

Nipomo Water Tower

The District continues efforts to; 1. Increase water conservation and water resource awareness; 2. Encourage County development approvals to consider the seriousness of the situation; and 3. Establish a supplemental source of water. A Board appointed Citizen's committee – made up of seven area residents who are volunteering their time – is working diligently to evaluate options for acquiring and delivering a supplemental source of water to the area. The Committee is meeting regularly (**public welcome!**) and is scheduled to report its findings to the Board of Directors by the end of February 2013.

SAVE WATER, SAVE MONEY!

For many customers the difference between summer water bills and winter water bills can be hundreds of dollars. Almost half the water use of a typical residential customer goes to landscape irrigation. Most landscapes are overwatered. For instance, in winter months most grasses and shrubs need little or no irrigation other than the natural rainfall. Closely monitoring your landscape irrigation can save hundreds of dollars every year. The District has many tips on how to check for leaks and address common irrigation issues. Learn more by calling 929-1133 or visiting www.ncsd.ca.gov. However; if tinkering with valves and automatic sprinkler controllers are not for you, consider having a local landscape contractor review your irrigation system once or twice yearly. In many cases the service call charge will be more than covered by the cost savings of more efficient irrigation.

Convenient Bill Payment Options:

For customer convenience, Nipomo Community Services District continues to offer an online bill paying service. This service accepts Visa, Master Card, Discover, and American Express, as well as debit cards and e-checks. Learn more at www.ncsd.ca.gov

Nipomo Community Services District Hires New Public Information Assistant

On December 11, 2012 the Nipomo CSD introduced Jessica Matson as their new Public Information Assistant. Jessica Matson comes to Nipomo CSD with a background in marketing and community outreach with various non-profit and public sector organizations.

The Public Information Assistant is responsible for providing community outreach and communications in order to keep District customers informed regarding their water and waste water services. With the newly created Public Information Assistant position now filled, the Nipomo community can look forward to a few new informational items in the near future including a quarterly District-wide newsletter in 2013, an improved District website, and more.

Public feedback is always welcomed and valued. Jessica can be reached at 929-1133 or jmatson@ncsd.ca.gov.

For more information, please contact the Nipomo Community Services District at 929-1133 or visit www.ncsd.ca.gov.

Established in 1965 to meet the health and sanitation needs of the local community, Nipomo Community Services is pleased to provide a wide variety of services throughout its district including the provision of water, sewer, and waste management services as well as lighting and drainage in limited areas. The mission of Nipomo Community Services District is to provide its customers with reliable, quality, and cost-effective services now and in the future.

Trash Rates for Residential Customers May Increase in 2013

On December 12, 2012 the Nipomo CSD Board voted 3-2 to begin the process of raising trash rates. In the past, the District has deferred rate increases by using solid waste reserve funds. The proposed increase would help offset higher fuel costs, landfill rates and other administrative costs.

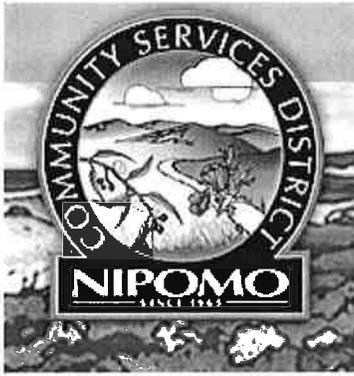

If approved, residents will see an increase starting March 1st. The rate increase would be modest. Residents who currently pay \$15 for a 32-gallon garbage wheeler will see their rate increase to \$16.74 per month. Likewise, residents who currently pay \$28.16 for a 96-gallon wheeler would see their rate increase to \$31.43 per month.

The District will be mailing notices to residential customers next week regarding the proposed rate increase. Residents will have 45 days to protest the rate increase by sending a written statement to the District office at P.O. Box 326, Nipomo, CA 93444. Written statements can also be hand delivered to the District office located at 148 S. Wilson St. up until the time of the public hearing scheduled for February 13th at 9am.

For more information, please contact the Nipomo Community Services District at 929-1133 or visit www.ncsd.ca.gov.

District's Board Swear in New Directors

December 12, 2012 – The District's Board of Directors held their regular meeting on Wednesday at 9 am.

New Directors Bob Blair and Craig Armstrong were sworn in by the District's General Manager, Michael LeBrun.

The Board also elected Jim Harrison to serve as Board President for the 4th consecutive year along with Larry Vierheilg to serve as Vice President for the 4th consecutive year.

The next Board meeting is scheduled for Wednesday, January 9th at 9 am.

For more information or to view official minutes, please contact the Nipomo Community Services District at 929-1133 or visit www.ncsd.ca.gov.

Established in 1965 to meet the health and sanitation needs of the local community, Nipomo Community Services is pleased to provide a wide variety of services throughout its district including the provision of water, sewer, and waste management services as well as lighting and drainage in limited areas. The mission of Nipomo Community Services District is to provide its customers with reliable, quality, and cost-effective services now and in the future.

District's Board Supports Cypress Ridge Residential Development

December 12, 2012 – The District's Board of Directors held their regular meeting on Wednesday at 9 am.

When considering Cypress Ridge's application for a Conditional Use permit and allow increased residential development within the Nipomo mesa groundwater conservation area, the Board supported the application and directed staff to continue following through with the County's process.

The Board supports the project as long as the project remains compliant with County Ordinance 3090 and 3160 (water resource ordinances that prohibits new development from increasing non-agriculture related water demand).

The next Board meeting is scheduled for Wednesday, January 9th at 9am.

For more information or to view official minutes, please contact the Nipomo Community Services District at 929-1133 or visit www.ncsd.ca.gov.

Committee Evaluates Supplemental Water Options for the District

On December 19, 2012, the District's Supplemental Water Alternatives Evaluation Committee met. The 7-member citizens' committee is evaluating options for acquiring and delivering supplemental water to the District and its customer by June 2015. In the face of every growing concerns over the area's groundwater supplies, which the District and others on the Nipomo mesa rely on exclusively for potable supply, Nipomo CSD seeks to diversify supply and bolster long-term reliability. The Evaluation Committee was formed last spring following the failed tax measure to fund an intertie pipeline for delivery of supplemental water from the City of Santa Maria. The Committee is scheduled to complete its work and report to the District Board of Directors in February 2013.

Committee Members: Dan Garson, Dennis Graue, Kathie Matsuyama, Robert Miller, Dave Watson, Sam Saltoun, Dan Woodson

Next Committee Meeting: Monday, January 14, 2013, 1PM, District Board Room 148 South Wilson, Nipomo

For more information or to view the minutes, please contact the Nipomo Community Services District at 929-1133 or visit www.ncsd.ca.gov.

Soquel Creek Water District Appoints New Board Member at Critical Time

Richard Meyer replaces Daniel Kriege, who served the board for 39 years.

- [By Patch Staff](#)
- [Email the author](#)
- December 14, 2012

On Tuesday, Soquel Creek Water District's board of directors appointed a new member: Richard Meyer.

Meyer took the place of Daniel Kriege, who resigned after 39 years of service.

An Aptos resident, Meyer applied for the position out of his concern for water supply and climate change. He spent 25 years working in management in Silicon Valley high-tech companies, and in 2008 launched a consulting business helping clients reduce their carbon footprints.

He joins the District at a critical time, according to board members in a press release. The District currently relies on underground aquifers to provide water to its customers. Yet the aquifers are in a state of overdraft, with water pumped out faster than it is replenished.

The amount of water being pumped from the aquifers needs to be reduced 35 percent for 20 years to allow water levels to recover and prevent seawater intrusion from contaminating the water supply, they said.

The District is seeking solutions through the development of a supplemental water supply including evaluation of a proposed desalination facility in partnership with the City of Santa Cruz, water exchanges, increased conservation and possible future water restrictions, said board members.

The Soquel Creek Water District is a nonprofit, local government agency providing water to Capitola, Aptos, La Selva Beach, Opal Cliffs, Rio Del Mar, Seascape and Soquel.
