## GENERAL MANAGER'S REPORT

### ITEM

Standing report to your Honorable Board -- *Period covered by this report is May 9, 2016 through May 21, 2016.*

### DISTRICT BUSINESS

#### Administrative

The District encourages residents to provide reports of any observed water waste. Staff follows up each report with phone calls and written notice to customers when warranted.

#### **Office Activities**

|   | Apr-16 | Year-to-Date |
|---|--------|--------------|
| Reports of water waste followed up on     | 0      | 4            |
| Accounts with abnormally high water usage | 12     | 52           |
| Leak Adjustments                          | 1      | 10           |
| Amount                                    | \$154  | \$2,216      |

#### Water Resources

##### **1) Total Production**

|                             | Apr-16 | Year to date<br>Jul-Apr 2016 |
|-----------------------------|--------|------------------------------|
| Groundwater production      | 99.3   | 892.9                        |
| Supplemental water imported | 55     | 541.2                        |
| Total production/usage      | 154    | 1,280.3                      |

To meet the District's target of bringing a minimum of 645 acre-feet of supplemental water into the community for fiscal year 2015-16, the District must maintain an average of 53.75 acre-feet/month. Table 1 – Total Production shows the District imported 55 acft in April, bringing the YTD total to 541.2 acft through the SWP. For the remaining 2 months of the fiscal year, the district will import 52 acft/month. By doing so, the District will achieve 104 acft of supplemental water and reach the fiscal year objective of 645 acft of imported supplemental water.

**2) Production versus State Reduction Target for 2016**

|                                 | Apr-16       | Year-to-Date<br>Jul-Apr 2016 |
|---------------------------------|--------------|------------------------------|
| Total production for FY 2015-16 | 153.8        | 1,434.1                      |
| Total production for 2013       | <u>224.0</u> | <u>2,107.9</u>               |
| Reduction                       | -70.2        | -673.8                       |
| Percentage reduction            | -31.3%       | -32.0%                       |
| Target reduction per state      | -28.0%       | -28.0%                       |
| Over (under) target reduction   | 3.3%         | 4.0%                         |

The District's State-mandated reduction goal is 28% month to month and cumulative. The community exceeded the State-mandated reduction goal by 3.3% for the month of April, and the cumulative by 4%.

**3) Production versus NMMA Reduction Target for the Period**

|                                  | Apr-16       | Year-to-Date   |
|----------------------------------|--------------|----------------|
| Total production for 2016        | 153.8        | 1,434.1        |
| Average production for 2009-2013 | <u>199.0</u> | <u>2,008.1</u> |
| Reduction                        | -45.2        | -574.0         |
| Percentage reduction             | -22.7%       | -28.6%         |
| Target reduction per NMMA        | -30.0%       | -30.0%         |
| Over (under) target reduction    | -7.3%        | -1.4%          |

Due to the Spring 2015 Key Wells Index results, NMMA public water purveyors (NCSD, Golden State WC, and Woodlands Mutual WC) are required to reduce groundwater production by 30%. The District remains in Stage III Shortage conditions. April saw an increase in consumption over March driving the community's water use above the five-year average, exceeding it by 7.3%. Year to date, the community's conservation efforts are on target to meet a 30% demand reduction.

**4) GW Only Production versus NMMA reduction target for the period**

|                                     | Apr-16       | Year-to-Date  |
|-------------------------------------|--------------|---------------|
| Total GW Production for FY 2015-16  | 116.7        | 1,066.1       |
| Average GW Production for 2009-2013 | <u>199.0</u> | <u>2008.1</u> |
| Reduction                           | -99.7        | -942.0        |
| Percentage reduction                | -50.1%       | -46.9%        |

Table 4 looks at NCSD's groundwater pumping only by excluding the 33% credited to our purveyor customers and the community's supplemental import water consumption. NCSD's ground water pumping reduction of 50.1% for the month of April exceeds Stage III reduction of the NMMA endorsed Water Shortage Response plan by 20%. **NCSD can claim a Year-to-Date reduction in groundwater production of 46.9%.**

### 5) Rainfall Gauge

| Rainfall Summary (in inches) | Nipomo East<br>(Dana Hills Reservoirs) | Nipomo South<br>(Southland Plant) |
|------------------------------|--|-----------------------------------|
| Monthly Total                | 0                                      | 0                                 |
| Seasonal Total to Date       | 8.62                                   | 6.93                              |
| Average Year                 | 18                                     | 16                                |

The rainfall gauge readings are from San Luis Obispo County's two rain gauges in the NCSD area.

### Safety Program

- No accidents or incidents to report.

### Public Outreach

- The following Public Outreach Program materials are attached:
  - A summary of recent outreach and education activities
    - District related outreach, advertising and news coverage
    - Press release log
    - Social media traffic summary and website statistics

### Other Items and News of Interest

There are no other items for May 2016.

### Supplemental Water Capacity Accounting

The District is not currently accepting applications for new water service. No change from the previous report.

|  |                  |
|--|------------------|
| <b>Supplemental Water Available for Allocation</b>                 | 500 AFY          |
| <b>Supplemental Water Reserved (Will Serve Letter Issued)</b>      | -5.8 AFY         |
| <b>Subtotal Net Supplemental Water Available for Allocation</b>    | 494.2 AFY        |
| <b>Supplemental Water Assigned (Intent-to-Serve Issued)</b>        | -206.3 AFY       |
| <b>Total Remaining Supplemental Water Available for Allocation</b> | <b>287.9 AFY</b> |

NOTE: 206.3 AFY of water reservations represents approximately \$3.2 million in potential Supplemental Water Capacity Charges.

**Meetings (May 9 through May 20)**

*Meetings Attended (telephonically or in person):*

- May 9, Southland WWTP – Reclaim Water Prog.
- May 10, Drought Report
- May 10, Funding Fair – San Luis Obispo
- May 11, Regular Board Meeting
- May 11, Public Information Program Director
- May 11, GSWC – Cypress Ridge CIP Planning
- May 11, Management Team
- May 12, Mike Seitz – General Counsel
- May 16, NMMA – Monthly Debrief w/Peter Sevcik
- May 16, Board Officers
- May 17, Public Information Program Director
- May 17, Operations/Admin Coordination
- May 17, Brad Anderson – Nipomo Oaks Assisted Living
- May 18, Lucia Mar School District – Raynee Daley
- May 18, Jim Harrison
- May 19, Management Team
- May 20, Michael LeBrun

- *May 21, Chamber of Commerce Street Fair*

*Meetings Scheduled (May 23 through May 27):*

- *May 9, Southland WWTP – Reclaim Water Prog.*
- *May 10, Drought Report*
- *May 10, Public Information Program Director*
- *May 11, Regular Board Meeting*
- *May 12, Management Team*
- *May 13, Mike Seitz – General Counsel*

**RECOMMENDATION**

Staff seeks direction and input from your Honorable Board

OUR NIPOMO

# Nipomo Lions Club marking 10th anniversary

Nipomo Lions Club was chartered 10 years ago this month and will celebrate from 6 to 9 p.m. Thursday, May 10, at Willow, located at Willow and Pomeroy roads.

TONI WEITZEL

The party is by invitation only. It seems like the club has always been here doing many things for the community. It has come so far and done so much.

I say that from the bottom of my heart, not only because I was honored as well as proud to be the charter president 10 years ago but also because all who have followed me in leadership have done better than the one before. That makes the club become very great, and it has grown.

Congratulations on 10 years of service to Nipomo and the surrounding areas.

### A garden for kids

Nipomo Native Garden will have a ribbon cutting for the Children's Garden at 11 a.m. Saturday, May 7, with events going until 2 in the garden on Osa Ge Street at Camino Caballo.

There will be a number of activities for the children to participate in. I hope you all remember the Flamingo Flurry and how much fun it was to have the Flamingo Book appear in your yard as an incentive to help the Children's Garden projects get underway.

Now you need to get out there and see all the great work they have done for the kids and what fun the kids will be having. For more information, contact Cindy Jelinek at 929-3589.

### New businesses in town

Two businesses recently opened their doors in Nipomo. Blur Hair Studio is located at 255 N. Wilson St.

Call the salon at 723-5060 for information and an appointment.

Daisy Delights Bakery is located at 235 W. Tenth St. I am told their baked goods are fantastic. I have not tried them yet but will be sure. For information, call 619-7888 or visit daisy-delights.com.

### A Nipomo queen?

The Santa Maria Elks Lodge will take place June 2 through 5, and this year we have a Nipomo contestant sponsored by a Nipomo organization.

Angela Avila-Magallon, 16, is sponsored by Nipomo Youth Football, and she is very lovely — in my opinion the prettiest of the bunch.

Would it not be quite exciting to have our Nipomo girl crowned queen? So proud her and get her elected.

To find out how, visit www.Nipomo1000.com. Queen.com or call Rebecca Barks at 896-2674, Oscar Magallon at 310-1192, Leigh Ann Groshart at 896-7872 or Arlenea Kent at 300-7272.

### Stop domestic abuse

Girls Night Out will present a customer appreciation and domestic abuse awareness event with two guest speakers at 6:15 p.m. Tuesday, May 10, at Blacklake Golf Resort. A happy birthday to Mary Kay, too.

To reserve a spot and a special gift, call 929-5282 or 951-4288. I look forward to seeing you all there.

### Spring in the street

The Old Towne Nipomo Spring Street Fair will take place Saturday, May 21, on West Tenth Street, which will be closed to traffic between Wilson and Mallagh streets.

Admission to the festival and parking will be free. This should be lots of fun for the entire family, so come on down to Old Towne and have a great time.

For more information, call the Nipomo Chamber of Commerce at 929-3583 or visit nipomochamber.org.

### Remember mom

Do not forget Mother's Day on Sunday, May 8. There are many things you can do for her — flowers, candy, brunch, dinner and much more.

Blacklake Golf Resort will hold its wonderful brunch, or you can treat mom to a day at Healing Touch Day Spa, which has many specials just for her.

Those are just a few hints for your favorite lady. Now go get it.

### Critter Corner

Well, still no critter babies have been seen, and we are all a little anxious. We have had visits from little Mama Raccoon. She is small and sweet and still loves her grapes.

I know how many have heard or seen the coyotes lately, and they are concerned about that.

Toni Weitzel is the owner of the best of everything, featuring unique gifts and gift baskets, and a former president of the Nipomo Chamber of Commerce. Nonprofit and other community organizations may submit items for this column by contacting her at 343-0283 or toniweitzel@gmail.com.

## Lange

Indeed, Lange's staff saw students' scores rising in other subjects like math. For Schimandle, who taught at Lange during its first three years and served as its principal for the last four years, the state award is just proof that the teachers are improving their students' education.

"I'm so happy for my staff," she said. "When you do something new, it's hard. It's hard to teach in new ways and use new assessments. But when you see the results, it really makes the payoff worthwhile."

FRANK CONSA, CONGRESSMAN, tribid chair of the Yuki Tipu Tipu Northern Chamash, speaks as Congresswoman Lois Capps, left, and San Luis Obispo County 2nd District Supervisor Bruce Gibson listen during an event at the Pismo Pier.

## Sanctuary

The area encompasses a diverse ecosystem that is home to whales, dolphins, elephant seals, kelp, numerous fish species and more.

"I'm coming at this from the mindset that's what good for the ocean is good for all of us in the long run," said San Luis Obispo County 2nd District Supervisor Bruce Gibson. "There's still a lot of work to be done, but we will get that work done by working together."

Ultimately, NOAA will have the final say whether to add the area to a list of 14 national marine sanctuaries.

Four of those are located in California, with the proposed Chamash designation seen as a bridge between existing national marine sanctuaries in the Channel Islands and Monterey areas.

"This area is sitting target unless we bring forward greater protection for it," San Luis Obispo Mayor Jan Moux said, noting the San Luis Obispo City Council earlier this year unanimously endorsed penning a letter to the Board of Supervisors requesting it support efforts to create the local marine sanctuary. "It's a regional treasure."

What the sanctuary would look like would evolve during that time, which could take anywhere from two to six years. When that could happen is unknown.

"This is really grass-roots activism," said Margaret J. Webb, Monterey Bay National Marine Sanctuary Advisory Council chairwoman. "This is an example of the government paying attention to the people and what they are saying."

The nomination for the local marine sanctuary was submitted last summer by the Northern Chamash Tribal Council.

Capps submitted a letter Monday to NOAA Administrator Kathryn Sullivan urging the agency to consider approving the designation.

"The Chamash Heritage National Marine Sanctuary would provide a much-needed safeguard to ensure the preservation of this coastal treasure," Capps wrote. The California Coastal Commission also is unanimously in favor of the proposed sanctuary.

**NIPOMO FOOT & ANKLE**

Nipomo Community Services District

NOTICE OF PUBLIC HEARING

2015 URBAN WATER MANAGEMENT PLAN UPDATE

NIPOMO COMMUNITY SERVICES DISTRICT

THE NIPOMO COMMUNITY SERVICES DISTRICT  
WILL HOLD A PUBLIC HEARING TO CONSIDER ADOPTION OF THE  
2015 URBAN WATER MANAGEMENT PLAN, (UWMP)  
ON MAY 25, 2016, AT 9:00 A.M.  
AT THE DISTRICT'S JON S SEITZ BOARD ROOM  
148 S. WILSON STREET  
NIPOMO, CALIFORNIA

THE 2015 URBAN WATER MANAGEMENT PLAN IS AVAILABLE FOR REVIEW AT  
THE DISTRICT OFFICE, 148 S WILSON STREET, BETWEEN THE HOURS OF  
8:00 AM TO 4:00 P.M. MONDAY THROUGH FRIDAY  
AND ON THE DISTRICT'S WEBSITE AT [NCS.D.CA.GOV](http://NCS.D.CA.GOV).

AFTER RECEIPT OF PUBLIC TESTIMONY,  
THE DISTRICT BOARD MAY APPROVE THE UWMP OR CONTINUE ITS CONSIDERATION  
AND APPROVAL  
OF THE UWMP TO ANOTHER DATE.

THE DISTRICT ENCOURAGES PUBLIC PARTICIPATION AND COMMENT

Publish on 5/11/2016 and 5/18/2016

## Building Certainty in Uncertain Times

**A message from the General Manager**

It's difficult to consider repeating the last 5 years of uncertain weather and dwindling rainfall here in Nipomo. You don't have to be that old to remember a time when one may have cursed the rain for disrupting scheduled outings. Yes, there was a time when winters were wet. Rain fell on the Sierra Madres east of Nipomo and dazzled us as it infused emerald green colors on the hills, which were made more vibrant with each passing storm-front. Today, we look west over the ocean's horizon wondering if we'll get a storm-front?

For the fifth consecutive year, Central and Southern California experienced below average rainfall leaving groundwater basins and reservoirs in these regions at historic low levels. The Department of Water Resources Snow Survey Report (State-wide May 2016) measurements are only at 55% of average. With less snow in the mountains there will be less snow-melt. This in turn will lead to reduced run-off so rivers don't recharge groundwater basins nor fill up dams for summer use. Add these conditions to 5 years of warnings and water conservation messaging and water users can experience "drought fatigue" – an overwhelming feeling of worry that there is little that anyone can do to solve the problem.

Here is where the value of community becomes tangible. Communities come together during difficult times to pool their resources and solve extraordinary problems. Being aware of the value of water and practicing good stewardship of this valuable resource is a community's best weapon against re-occurring droughts. Understanding that water is a limited resource and carrying this thinking beyond the dry drought years can only serve us as we develop water sustainability strategies.

To that end, it is imperative that water agencies build a community's portfolio of water supply sources. Source water diversity diminishes uncertainty and brings value to a community by protecting property values and the community's environment. These are the returns good planning and deliberate, decisive action can provide to communities committed to solving their water challenges.

Nipomo Community Services District (NCSD) has executed a plan to support the water needs of its community. As of July 2015, NCSD began bringing water onto the Mesa through the first phase of the [Nipomo Supplemental Water Project](#). The addition of this valuable asset relieves the community's sole reliance on groundwater pumping and provides an alternate source of water that will help sustain the Nipomo Mesa's groundwater basin now and in the future. As the project progresses through the remaining two phases, the community gains greater certainty in its water supply.

The uncertainty of the weather may persist well beyond our years. NCSD, representing the community, can face future uncertainty knowing it has a response plan and the will to act when it comes to solving its water supply challenges. Even those who differ in opinion from the current plan and actions taken by NCSD can agree that there is a need for drought prone communities like Nipomo to come together to build certainty into their water supply.

### **April Conservation Steady**

The District's conservation efforts remain steady and exceed the State's mandated 28% reduction.

In April, the District produced 154 acre feet or about 50 Million gallons of water to meet customer demand. This equates to a 31.3% reduction in overall production compared to April 2013. Additionally, thanks to the arrival of supplemental water last July, groundwater pumping during April was 50.1% lower than the 5-year average for April!

With the continued drought and lack of rain, conservation remains very important. As always, [saving water saves money!](#)

## Blacklake Sewer Master Plan Moves Forward

In April, the District's Board of Directors agreed to move forward with the completion of the Blacklake Sewer Master Plan.

Given the age of the overall Blacklake Wastewater System, the Board initiated the Blacklake Sewer Master Plan in 2013 and selected Michael K. Nunley (MKN) & Associates, Inc. to prepare the plan. Portions of the project have been completed.

The objectives of the Plan are to:

- Evaluate the condition of the existing wastewater collection and treatment system
- Identify wastewater collection system issues... [Read More](#)

## 2015 Urban Water Management Plan Update

The public draft is now available for review at the District office and on the website at [www.ncsd.ca.gov](http://www.ncsd.ca.gov). The Board of Directors is scheduled to hear a presentation of the Plan at its May 25, 2016 Regular Board Meeting.

## Reminder

### **Scheduled Supplemental Water Rate Increase July 1st**

In November 2014, the Board of Directors approved a Supplemental Water rate schedule to pay for the water imported from Santa Maria. The rate was implemented in July 2015 once the first deliveries of water arrived. The next scheduled increase will be effective July 1st, 2016. For the full rate schedule, visit the District's website at [www.ncsd.ca.gov](http://www.ncsd.ca.gov).

**NCSO 2015 Urban Water Management Plan (UWMP)**

The District is currently in the process of developing its Urban Water Management Plan (UWMP).

Every five years, the California Department of Water Resources (DWR) requires that water suppliers like the Nipomo CSD, update its Urban Water Management Plan (UWMP). Every urban water supplier that either provides over 3,000 acre-feet of water annually, or serves more than 3,000 urban connections is required to assess the reliability of its water sources over a 20-year planning horizon, and report its progress towards a 20% reduction in per-capita urban water consumption by the year 2020. DWR staff then reviews the submitted plans to make sure they have completed the requirements and submits a report to the Legislature summarizing the status of the plans.

UWMPs are prepared by California's urban water suppliers to support their long-term resource planning, and ensure adequate water supplies are available to meet existing and future water demands.

The Nipomo CSD has enlisted the professional engineering services of Michael K. Nunley (MKN) & Associates, Inc. and partnered with local agencies to prepare the Plan. Preparation of the Plan includes analysis of projected population growth, current and future water demands, as well as water supply and pumping data.

The District's Board will hear a presentation of the Plan at its May 25, 2016, Regular Board meeting. Adoption of the Plan is scheduled for June 8, 2016.

A public draft is currently available for review at the District office and on the District website.

For more information please contact the Nipomo Community Services District at 929-1133, [info@ncsd.ca.gov](mailto:info@ncsd.ca.gov) or visit [www.ncsd.ca.gov](http://www.ncsd.ca.gov).

###

Established in 1965 to meet the health and sanitation needs of the local community, Nipomo Community Services is pleased to provide a wide variety of services throughout its district including the provision of water, sewer, and waste management services as well as lighting and drainage in limited areas. The mission of Nipomo Community Services District is to provide its customers with reliable, quality, and cost-effective services now and in the future.

[http://theadobepress.com/news/local/article\\_ee31ff0a-462e-55ab-b956-40bb8bd9615f.html](http://theadobepress.com/news/local/article_ee31ff0a-462e-55ab-b956-40bb8bd9615f.html)

## **NCSD updating its urban water management plan**

Staff Report Updated May 18, 2016

The Nipomo Community Services District Urban Water Management Plan is being updated, and a draft of the proposed revised plan is now available for public review online and at the district office.

NCSD directors will hear a presentation on the proposed plan at their regular meeting set for 9 a.m. Wednesday, May 25, in the Jon S. Seitz Board Room of the district office at 148 S. Wilson St.

Members of the public will have an opportunity at the meeting to comment on the revised plan, which is scheduled for adoption at the board's Wednesday, June 8, meeting.

Every five years, the California Department of Water Resources requires water suppliers that deliver more than 3,000 acre-feet of water annually or serve more than 3,000 urban connections to update their urban water management plans.

Water management plans are used by purveyors to support their long-term resource planning and ensure adequate water supplies are available to meet existing and future water demands, an NCSD spokesman said.

Water purveyors are required to assess the reliability of their water sources over a 20-year planning horizon and report their progress toward reducing per-capita water consumption 20 percent by the year 2020, the spokesman said.

The process includes analyzing projected population growth, current and future water demands and supply as well as pumping data.

NCSD's update is being prepared by engineering consultant Michael K. Nunley & Associates Inc. in partnership with other local agencies.

Once the updated plans are submitted to the state, the Department of Water Resources staff reviews them to make sure water suppliers have completed the requirements and submits a report summarizing the status of the plans to the state Legislature.

To review the draft updated plan, visit [www.ncsd.ca.gov](http://www.ncsd.ca.gov) or stop by the district office between 8 a.m. and 4:30 p.m. Monday through Friday.

For more information, contact NCSD at 929-1133 or [info@ncsd.ca.gov](mailto:info@ncsd.ca.gov).

[http://santamariatimes.com/news/local/potential-nipomo-skatepark-still-in-limbo/article\\_f8c4e10c-1104-5718-bd1f-224221b3fb9c.html](http://santamariatimes.com/news/local/potential-nipomo-skatepark-still-in-limbo/article_f8c4e10c-1104-5718-bd1f-224221b3fb9c.html)

## Potential Nipomo skatepark still in limbo

Updated May 17, 2016

Brandon Randolph practices his skills on a pipe projecting from a concrete slab foundation on South Frontage Road in Nipomo. The spot serves as a makeshift skatepark for youths, although they say the spot is hazardous.

Nipomo youth itching for a skatepark, athletes looking for more ball fields and residents longing for other improvements at Nipomo Community Park as well as those who want no further changes to the park will have to hold their collective breath a little longer while legal wrangling continues.

"This just keeps going on and on," said Tom Slater, a Mesa Middle School teacher helping Nipomo youth organize a movement to build the community's first skatepark. "Unfortunately, our hands are tied until they settle these issues in court, which is frustrating."

Skaters currently have nowhere to legally indulge in their sport in Nipomo and have to travel to other communities to find skateparks or skate illegally on private property.

But a skatepark is among the potential amenities proposed for Nipomo Community Park in a master plan developed over the course of years by county officials and community members.

Further steps toward park development appear to hinge upon whether county records show a sufficient and sustainable source of water to support park expansion.

The SLO County Board of Supervisors certified a final environmental impact report and approved the plan, but a group called the Nipomo Parks Conservancy filed suit against the county to block any improvements to the park.

In its suit, Nipomo Parks Conservancy claims the park plan is inconsistent with the County General Plan, the environmental analysis related to water supply is flawed and the plan violates the California Constitution's prohibition on unreasonable uses of water, among other issues.

Superior Court Judge Barry LaBarbera heard about an hour of arguments in Nipomo Parks Conservancy v. SLO County on March 14.

In a March 17 tentative ruling, he said the court's job is not to determine what is a better use of the park but whether proper procedure was followed in adopting the master plan.

"The central dispute relates to whether there is a sufficient and sustainable source of water to support the intended expansion of the park," LaBarbera wrote in his ruling.

The final program environmental impact report explains Nipomo Community Services District has supplied water to the park since 1984 and draws water from the Santa Maria Valley Groundwater Basin, which is in overdraft.

LaBarbera wrote that the water supply on the Nipomo Mesa is being used "at or beyond the established dependable supply of water or will be depleted before new supplies can be developed."

But he continued the case to May 13 so both parties could provide additional details, particularly regarding water sources.

When the court reconvened May 13, the county provided additional details on historic water use, projected use, water sources and conservation efforts.

"I tried to argue that NCSD is providing water to thousands of customers, and we're just one of those, and the water use isn't going to increase beyond what is being used now," said County Counsel Timothy McNulty.

"Even though everyone in the courtroom understands supplemental water is being delivered to the Mesa, the court was saying there's nothing in the record that tells me water's being delivered to the Mesa."

Although the park would require more water at its proposed full buildout, the county record shows the park is currently using nearly twice as much water as it could if conservation measures were put in place.

Implementing those measures could free up water for the remaining buildout.

"The pivotal conclusion in the FEIR is that the project will create no new net demand on existing water supply," LaBarbera wrote.

"The PEIR states that the park will be required to implement sufficient water conservation measures to reduce the existing water usage in half," he continued. "In addition, those same measures are anticipated to reduce, by half, the additional water demand for the project.

"Therefore the park's total water usage, through conservation measures, will remain at the historic average, resulting in no additional demands on water currently delivered."

At the time the EIR was approved, Nipomo Community Services District had not implemented the supplemental water project. NCSD voters in 2012 rejected a proposed assessment district that would have funded the pipeline.

But since then, NCSD has financed the first phase of the supplemental water project and began bringing in 650 acre-feet a year last July.

An acre-foot is about 326,000 gallons, or the amount of water generally considered necessary to supply four to 10 people for a year.

Future phases will increase the amount imported from Santa Maria to 3,000 acre-feet a year, but the plans for financing those phases have not been worked out.

"In this regard, it appears that the only uncertainty related to supply from the supplemental water project is the current inability to fund the infrastructure necessary for the court-mandated delivery of supplemental water," LaBarbera wrote in his May 13 ruling.

LaBarbera noted that while NCSD is entitled to buy water from the city of Santa Maria, the "status and feasibility of an actual delivery system is unclear. This issue appears to be a primary component to the adequacy of the PEIR and the decision on this issue has an impact on numerous other issues raised by the petition."

He said he expects both sides to present additional arguments regarding that issue.

But water is a nonissue for skatepark enthusiasts.

"We're tied to the whether or not there was due diligence," Slater said. "It's a bummer because the skatepark is concrete. You don't have to plant trees. You don't have to plant grass. You don't need any of that stuff.

"All we're going to be doing is taking the place of a hill full of weeds, which ultimately increases the value of the park and the property," he said.

## DROUGHT

# California regulators propose big shift in state water cuts

**Draft regulations would lift mandatory 25 percent statewide cuts**

**Governor's order extends ban on "wasteful" water use  
Brown calls for conservation to become part of "everyday life"**

*BY PHILLIP REESE AND RYAN SABALOW  
The Sacramento Bee*

In a major shift in California's urban water policy, state regulators Monday issued proposed conservation rules that would lift the mandatory 25 percent statewide water cuts in place since last June.

Instead, urban water agencies across the state would be required to conserve on a sliding scale tailored to their unique water supply conditions. A draft of the new targets released Monday by the State Water Resources Control Board would allow districts to "self-certify" how much water they expect to have in their supply assuming three additional years of drought, and the level of conservation necessary to ensure they do not run out of water.

Districts would be required to reduce water use by an amount equal to their projected shortfall. For example, in a district where three more dry years would leave a district 10 percent short of anticipated supply, the mandatory conservation target would be 10 percent.

The release of the draft rules came on the same day Gov. Jerry Brown issued a new executive order declaring that drought conditions persist and that the state must take permanent action to mitigate the likelihood of more frequent droughts.

In the short term, the order tells the State Water Resources Control Board to

adjust water conservation targets through January 2017.

The order also dictates that the water board and Department of Water Resources create new, permanent water use targets across California. Rather than the sweeping regulations in place over the past year, the order says those goals should be tailored to “the unique conditions of each water agency.”

Water agencies in the Sacramento area have been asking for more customized regulations that take into account regional water supply, groundwater reserves and climate.

It’s time for the state to “recalibrate our habits,” and change them “into an abiding ethic,” said Mark Cowin, director of the state Department of Water Resources.

Under the governor’s order, urban water districts will be required to report water use monthly to the state, extending a mandate that has been in place for more than a year. It permanently bans practices deemed wasteful, including hosing off sidewalks or driveways, washing cars with hoses that don’t have a shut-off nozzle, irrigating lawns in a way that causes runoff and irrigating lawns within 48 hours of precipitation.

“Californians stepped up during this drought and saved more water than ever before,” Brown said in a written release. “But now we know that drought is becoming a regular occurrence and water conservation must be a part of our everyday life.”

An El Niño weather pattern delivered more rain this water year than during any other year of the drought, but not as much as state officials had hoped. About threequarters of the state remains in severe, exceptional or extreme drought, according to the National Drought Mitigation Center.

Even so, the state’s two largest reservoirs — Shasta and Oroville — stand well above historic levels for this point in the year, as does Folsom Reservoir, leading some water districts to gripe the conservation targets currently in place are too high.

California water districts have faced mandatory conservation targets since June. From June to February, districts across the state were required to cut water use by 4 to 36 percent, depending on how much water per capita their residents used in 2014. All but a handful of districts in the Sacramento region were mandated to cut water use by 28 percent or more.

The targets were controversial. Soon after they were proposed, Sacramento area water districts began complaining that the one-size-fits-all rules were onerous, didn't account for variances in regional climate, and didn't give enough credits to improvements some districts had made to shore up local water supplies.

In February, the State Water Resources Control Board relaxed the conservation mandates for many inland communities, where hot, dry summers make it harder to keep lawns and trees alive. Many of the water agencies in greater Sacramento saw their targets fall by 3 percentage points.

"We don't want to cry wolf and we also don't want to put our heads in the sand," said water board chair Felicia Marcus.

" CALIFORNIANS STEPPED UP DURING THIS DROUGHT AND SAVED MORE WATER THAN EVER BEFORE, BUT NOW WE KNOW THAT DROUGHT IS BECOMING A REGULAR OCCURRENCE AND WATER CONSERVATION MUST BE A PART OF OUR EVERYDAY LIFE.  
Gov. Jerry Brown

## HISTORIC DROUGHT

# Calif. water bill: Why it's hard for Congress to pass

BY MICHAEL DOYLE

*McClatchy Washington Bureau*

## WASHINGTON

Five years into California's latest drought, a major water bill compromise can seem as far away as ever.

The perennial conflict, often summed up as fish vs. farms, subtly surfaced again Tuesday at a key Senate hearing. A Western growers' advocate pleaded for relief, a Trout Unlimited leader urged caution and lawmakers insisted on optimism while conceding the tough road ahead.

"This bill is the product of two years of work (and) 28 drafts," said Sen. Dianne Feinstein, adding that her legislation "can produce real water in a manner consistent with the Endangered Species Act."

The 100-minute hearing before the Senate Water and Power Subcommittee was the first this year on Feinstein's latest California water bill. Four other Western water bills were also reviewed, foreshadowing a Senate strategy of bundling together a West-wide measure attractive to multiple lawmakers.

An alternative Capitol Hill scenario envisions House of Representatives and Senate negotiators sliding California water provisions into must-pass spending legislation. Either option requires lawmakers to find a vehicle on which they can reconcile their differences.

Working out that conflict can get hard.

The Senate bill introduced by Feinstein in February increases limits on water transfers south of the Sacramento-San Joaquin Delta, but does not mandate specific pumping levels. It authorizes \$1.3 billion for desalination, water recycling,

storage and grants.

Timothy Quinn, executive director of the Association of California Water Agencies, offered support, adding that Feinstein's legislation "moves the federal government into closer alignment with key California water policies."

At the same time, Bureau of Reclamation Commissioner Estevan Lopez acknowledged that "concerns voiced by other stakeholders ... have resulted in some controversy" over the Feinstein bill.

Laura Ziemer, senior counsel and water policy adviser for Trout Unlimited, similarly warned that part of the Feinstein proposal "seems likely to fuel more litigation and conflict."

The Senate subcommittee hearing itself did nothing to resolve any of the conflicts. No more than one or two senators on the 13-member committee were generally present during the hearing, and of some 18 questions asked of the witnesses, only two touched on California.
